

ELISEU FRANCO SAMULOLO

Software Engineer

922 245 834 | eliseufranco26@hotmail.com | linkedin.com/in/eliseufranco

PROFESSIONAL PROFILE

Results-driven Software Engineer with a Bachelor's degree in Management and Informatics and hands-on experience delivering scalable web applications end-to-end. Proficient in Python, JavaScript, React, FastAPI, Vue.js, and Flask. Skilled in RESTful API design, relational database modelling (PostgreSQL, Supabase), Docker containerisation, and agile/scrum workflows. Combines solid engineering fundamentals with strong business acumen to build user-focused products that create measurable impact.

PROFESSIONAL EXPERIENCE

Software Engineer — Nafeta (Billing & Collections Management SaaS)

2026 - Present | Angola

- Developing a SaaS platform for billing management and collections automation, enabling businesses to streamline invoicing, track payments, and automate follow-up workflows.
- Architected backend services with FastAPI and Supabase (PostgreSQL) for client management, invoice generation, payment tracking, and automated collection rules.
- Built responsive React frontend with dashboards for real-time billing status, overdue accounts, and collections performance metrics.
- Implemented automated notification and escalation workflows to reduce manual effort in the collections process.

Tech stack: React - FastAPI - Python - Supabase - PostgreSQL - REST APIs

Software Engineer — Kukalakala (AI-Powered Recruitment Platform)

2026 - Present | Angola

- Building a job platform that connects candidates and companies, embedding AI throughout the hiring process from job matching to candidate screening.
- Designing intelligent matching algorithms to surface the most relevant candidates for each job opening and streamline recruiter workflows.
- Developing full-stack features spanning candidate profiles, company dashboards, job postings, and application tracking.
- Collaborating on the product roadmap to integrate AI-driven insights that reduce time-to-hire for companies.

Tech stack: React - FastAPI - Python - PostgreSQL - AI/ML - REST APIs

Software Engineer — Kutanga (Service Provider Marketplace)

2025 - Present | Angola

- Built and shipped core features of a service marketplace connecting skilled tradespeople (electricians, plumbers, etc.) with customers across Angola.
- Developed responsive React dashboards for service providers and customers using modern component-based architecture.
- Designed and implemented backend APIs with FastAPI covering service listings, bookings, ratings, and provider management.
- Collaborated in cross-functional agile teams to deliver customer-centric features and improve platform reliability.

Tech stack: React - FastAPI - Python - PostgreSQL - Docker - REST APIs

Software Engineer — Sales Control System

2025 | Freelance Project

- Architected a multi-user sales management platform for 3 food vending machines with secure role-based access control (RBAC).
- Built a real-time analytics dashboard with data visualisation to monitor sales trends and KPIs across machines.

- Delivered full-stack solution end-to-end: Vue.js frontend, Flask REST API, PostgreSQL database, all containerised with Docker.

Tech stack: *Vue.js - Tailwind CSS - Python/Flask - PostgreSQL - Docker - REST APIs*

Software Engineer — IRS Salary Calculator & Tax Simulator

2025 | *Personal Project*

- Implemented regulation-compliant tax algorithms based on official IRS and Social Security rules with multi-language support (Portuguese, Spanish).
- Engineered accurate financial calculations with comprehensive input validation and error handling.

Tech stack: *JavaScript - Python - HTML/CSS*

Software Engineer — Real-Time Currency Converter

2024 | *Personal Project*

- Integrated third-party exchange rate APIs with real-time data synchronisation and caching for improved performance.
- Built responsive Vue.js frontend and scalable Flask API backend.

Tech stack: *Vue.js - Flask - REST APIs - HTML/CSS*

Data Analyst Trainee — EGIS Road Operation Portugal

2024 | *Portugal*

- Performed in-depth analysis of road accident datasets to generate actionable business intelligence for executive stakeholders.
- Produced professional data visualisation reports using Python (Pandas, NumPy, Matplotlib).

Tech stack: *Python - Pandas - NumPy - Matplotlib - Data Analysis - Business Intelligence*

TECHNICAL SKILLS

Programming Languages: Python - JavaScript - C# - SQL

Frameworks & Libraries: React - FastAPI - Flask - Vue.js - Tailwind CSS - Pandas - Matplotlib - HTML/CSS

Databases & BaaS: PostgreSQL - Supabase - SQL Server

DevOps & Tools: Docker - GitHub - REST APIs - Agile/Scrum

EDUCATION

Bachelor of Science in Management and Informatics

Graduated 2024

LANGUAGES

Portuguese — Native (C2) | English — Intermediate (B1/B2) | Spanish — Intermediate (B1)
